EXPERIENCE

DRDO, RCMA

Intern

Sep 2025 – Oct 2025

Korwa, UP

- Gaining exposure to defense technologies and applied research
- Working in a technical environment focused on innovation and problem-solving
- Designed a workflow to streamline video detection and image mapping; gained accuracy of 85%–90%
- Assisting in the development by working on complex, real-time scenarios under expert supervision
- **Highlights:** Gaining exposure to advanced tools, simulation environment, and analysis of systems related to machine learning / data processing / embedded systems

INDIA SPACE ACADEMY

Trainee

July 2025 – Aug. 2025

New Delhi, India

- Worked with satellite imagery to study and interpret spatial patterns, terrain features, and environmental data
- Utilized GIS tools (QGIS/ArcGIS) for data visualization, mapping, and spatial analysis
- Developed thematic maps and performed preprocessing and analysis of geospatial datasets

HAL

Intern

July 2025 – Aug. 2025

Amethi, UP

- Learned fundamentals of avionics systems and aerospace technologies
- Developed an object detection tool to enhance productivity in intranet based environment by 85%

PROJECTS

Machine Learning Mini Projects(Independent Work)

- Did ML model implementation, data preprocessing, and explanatory analysis
- Worked with tools such as Python (NumPy, Pandas, scikit-learn) for data handling and model development

Intranet Based Object Detection

- Implemented object detection models (using DL frameworks like TensorFlow/PyTorch) for identifying and classifying objects in images or video streams
- Ensured data privacy and low-latency performance by deploying the solution on a local intranet without reliance on external cloud services

Sentiment Analysis

- This model classify text into positive, negative, and neutral categories using NLP techniques achieving 80% accuracy
- Performed text preprocessing and feature extraction (tokenization, TF-IDF) and implemented models in Python to effectively analyze user sentiment from textual data

EDUCATION

KIT, Kanpur

Bachelor of Technology in Computer Science and Engineering

Aug. 2024 – May 2028

UP, India

- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning
- **Hands On:** Cyber security Lab , Data Structure Lab, Web Design Lab

SKILLS

Languages : Python, Java, JavaScript (React.js), HTML/CSS, SQL (PostgreSQL, MySQL)

Tools : Figma, Label Studio, Gen AI, Google Analytics, Hugging Face, Teachable Machine Git, GitHub,
